MANIFESTO

CONSCIOUS LEADERSHIP

"The Davos of Consciousness"

MANIFESTO

This means that I am a conscious leader who contributes to positively inspire people and care about the environment.

Conscious Leadership Global Movement is not just a global movement, it is a way of being, a new model that powerfully transforms organizations, governments, people, families, communities and the planet. A call to action for leaders to live a life full of intention, openness, creativity, and passion, positively affecting people, communities and the planet.

The conscious leader is charismatic, inspiring, committed to learning and have the courage to find new solutions. Charismatic solutions, innovative with an honest outcome, simple and very direct. He is empathetic, compassionate, affectionate, thoughtful, cheerful, curious, listener and funny, it is real and simple. He likes to help others because he knows himself. He believes in others because he believes in himself, from a new vision.

HUMANITYE

He also believes in others potential and has the power to transform and find new paths. He is always present and communicates consciously. He is an integrator, who seeks to connect people to thrive a new model in society, a model based on a vision of conscious well-being and wisdom.

Conscious Leadership Global Movement is a collaborative platform, a movement that is a great community in which each one brings new solutions, ideas, open to research, experiences to the same platform and thus, progress in one direction, a Conscious Leadership Platform & Hub, that inspire other hub's. We call it "The Davos of Consciousness" because it's the place of gathering of different platforms, movements and communities on responsible and Conscious Leadership.

Conscious Leadership Global Movement is created to spark an inward look and inspires leaders, people with new challenges, a new way of being and life, serving others and the planet. The movement opens up new solutions, innovative research so that leaders become more aware of how they are leading their projects.

As a child I've always dreamed to be side by side with leaders - and having no concrete plan at that time, especially because I had no idea what I really wanted to do with this dream. But with the passage of time and simultaneously with my process of transformation, I was about to find out the real reason why: to join them in a "new walk", in a more conscious "vision" of themselves and an awakening.
